

A UNIQUE BLEND DESIGNED FOR IMMEDIATE AND LONG TERM BENEFITS.

ENDOMYCORRHIZAE

The highly-beneficial strains of Rhizoglomus irregulare BEG72 and Funneliformis mosseae form a symbiotic relationship with the plant to increase the root zone, hold more water and increase nutrient uptake.

TRICHODERMA ATROVIRIDE

These products contain HELLO NATURE's patented strain of micronized Trichoderma Atroviride* which colonizes and inoculates the root system quickly and increases the natural resistance of plants against pathogenic fungi of soils and plants. *MUCL 45632 (patent EP1876232)

BENEFICIAL BACTERIA OF THE RHIZOSPHERE

Bacteria are essential for living soils. This product contains **Bacillus licheniformis**, **Bacillus methylotrophicus, and Bacillus megaterium** to provide a host of benefits to the soil and plants.

PLANT STIMULATING PEPTIDES™

These products contain HELLO NATURE's Vegetal Protein Hydrolysate and therefore contains what we call Plant Stimulating PeptidesTM that stimulate the plant's natural processes to enhance nutrient absorption, mitigate the effects of abiotic stress and increase fertilizer efficiency. Plant Stimulating Peptides™ also promote the production of beneficial bacteria within the rhizosphere and stimulate root hair growth.

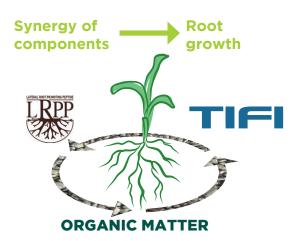

THE ADVANTAGES

- Mitigates Plant Stress
- Increases Microbial Production
- Increases Root Development
- Increases Nitrogen Use Efficiency (NUE)
- Improves overall disease suppression

*w*ater soluble powde

INNOVATIVE COMPONENTS FOR MAXIMUM **EFFICIENCY**

Lateral Root Promoting Peptide (LRPP)

Vegetal peptide identified in the peptides resulting from the exclusive HELLO NATURE vegetal protein hydrolysis process:

- Activation of cell multiplication.
- Stimulation of root development.
- Dynamism of germination and of rhizogenesis.
- Rapid biostimulant effect on the plant.

Trichoderma atroviride MUCL45632

Natural soil fungus selected by our laboratory for its beneficial properties:

- Stimulation of root development.
- Plant growth stimulation.
- Phosphorus solubilization.
- Rapid development within the rhizosphere.
