

ECOVAM™

ENDO | ECTO MYCORRHIZAE

- High-quality mycorrhizae blends
- Soluble powders & granulated

ENERGIZE NATURE!

- **IMPROVES:** Survival, Rooting, Water Absorption, Nutrient Availability, Plant and Soil Health, Flowering, Yields and Production, Plant Respiration, and Photosynthesis.
- **PROMOTES:** Cell Division and Lateral Bud Development; Delays the Aging Process.
- **REDUCES:** Plant Loss, Fertilizer Use, Need of Pesticides, Heat Stress Damage, Irrigation Frequency, Losses from Drought

ECOVAM is used as a potting or soil amendment in media at as low as 1/4 lb. per cu. yd. The results are quick root adaption to “real world conditions.”

ECOVAM protects the plant from predators and establishes conditions for strong, healthy, plants

One-Time Application of seven species of **endomycorrhiza fungi**.

Use **ECOVAM** by tilling into the ground, banding with seed and fertilizers, with rooting gels, hydromulching, vertimulch, potting soil amendment, and numerous other techniques that place the product into direct physical contact with roots of plants.

THREE FORMULATIONS WITH 7 SPECIES OF MYCORRHIZAE:

ECOVAM ENDO 10X
Fine Soluble Powder

454,000 Spores per pound of
Endomycorrhizal Fungi

ECOVAM
ENDO FINE
Fine Soluble Powder

90,800 Spores per pound of
Endomycorrhizal Fungi

ECOVAM ENDO
GRANULAR

90,800 Spores per pound of
Endomycorrhizal Fungi

7 Species mycorrhizae

Glomus intraradices
 Glomus mosseae
 Glomus deserticola
 Glomus claroideum
 Glomus etunicatum
 Glomus microaggregatum
 Glomus clarium
